

The Three Streams of Digital Disruption. Eye-opening Findings from Science

The digitalization has unfolded its disruptive power in three streams and is much further down the road as most of us would think. **Managers, be aware of the three streams of digital disruption and start adapting your marketing strategies now!**

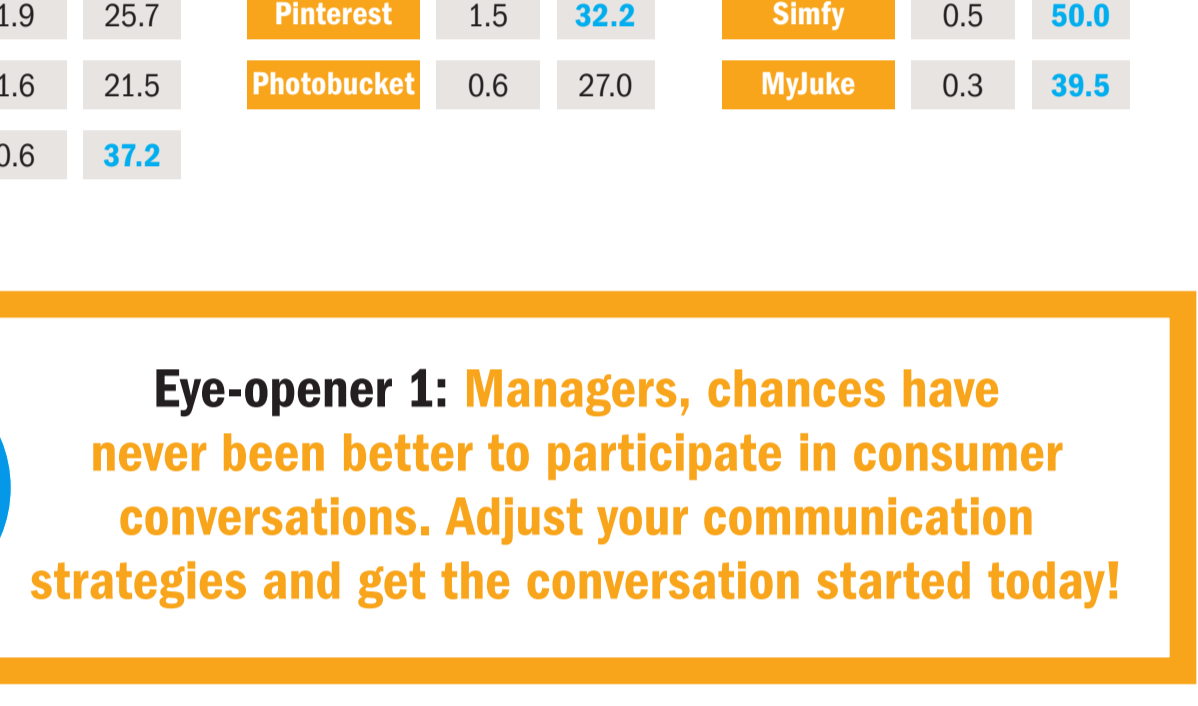

1 Digitalization of Communication

37% of all our daily communication is digital already. > We use digital phones, computers, smartphones, e-readers, tablets, consoles, TVs, messengers, apps, email, logging devices, and uncountable other devices to communicate with each other.

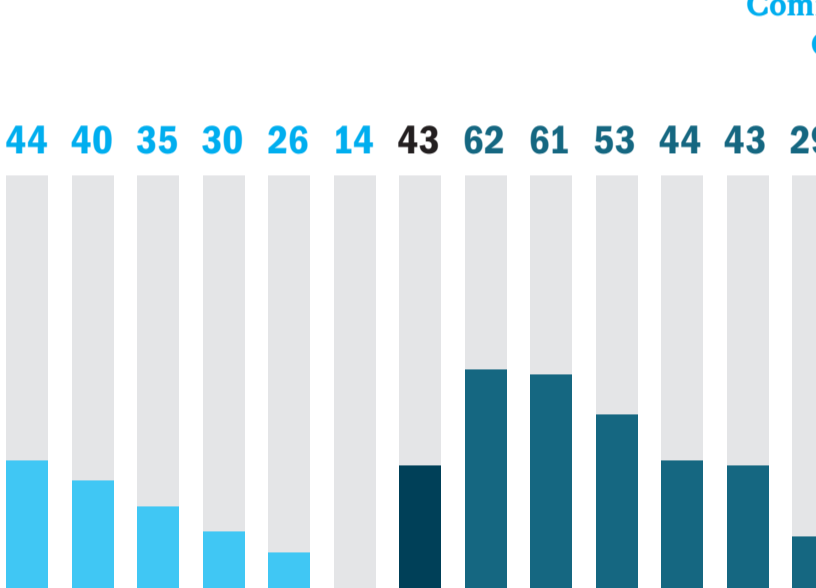

1h increase in daily surfing time since 2012. > Average Internet usage increased to 4h 35 minutes per user per day.

Time Spent on the Internet on an Average Day (in Percent of German Internet Users)

27% increase in mobile surfing since 2012. > Every 4th minute online is mobile now.

171% growth for Spotify since 2012. > Media networks are the current hot spots when it comes to social platforms. The daily usage rate per consumer goes up to 43% for video, 55% for picture, and 50% for sound communities.

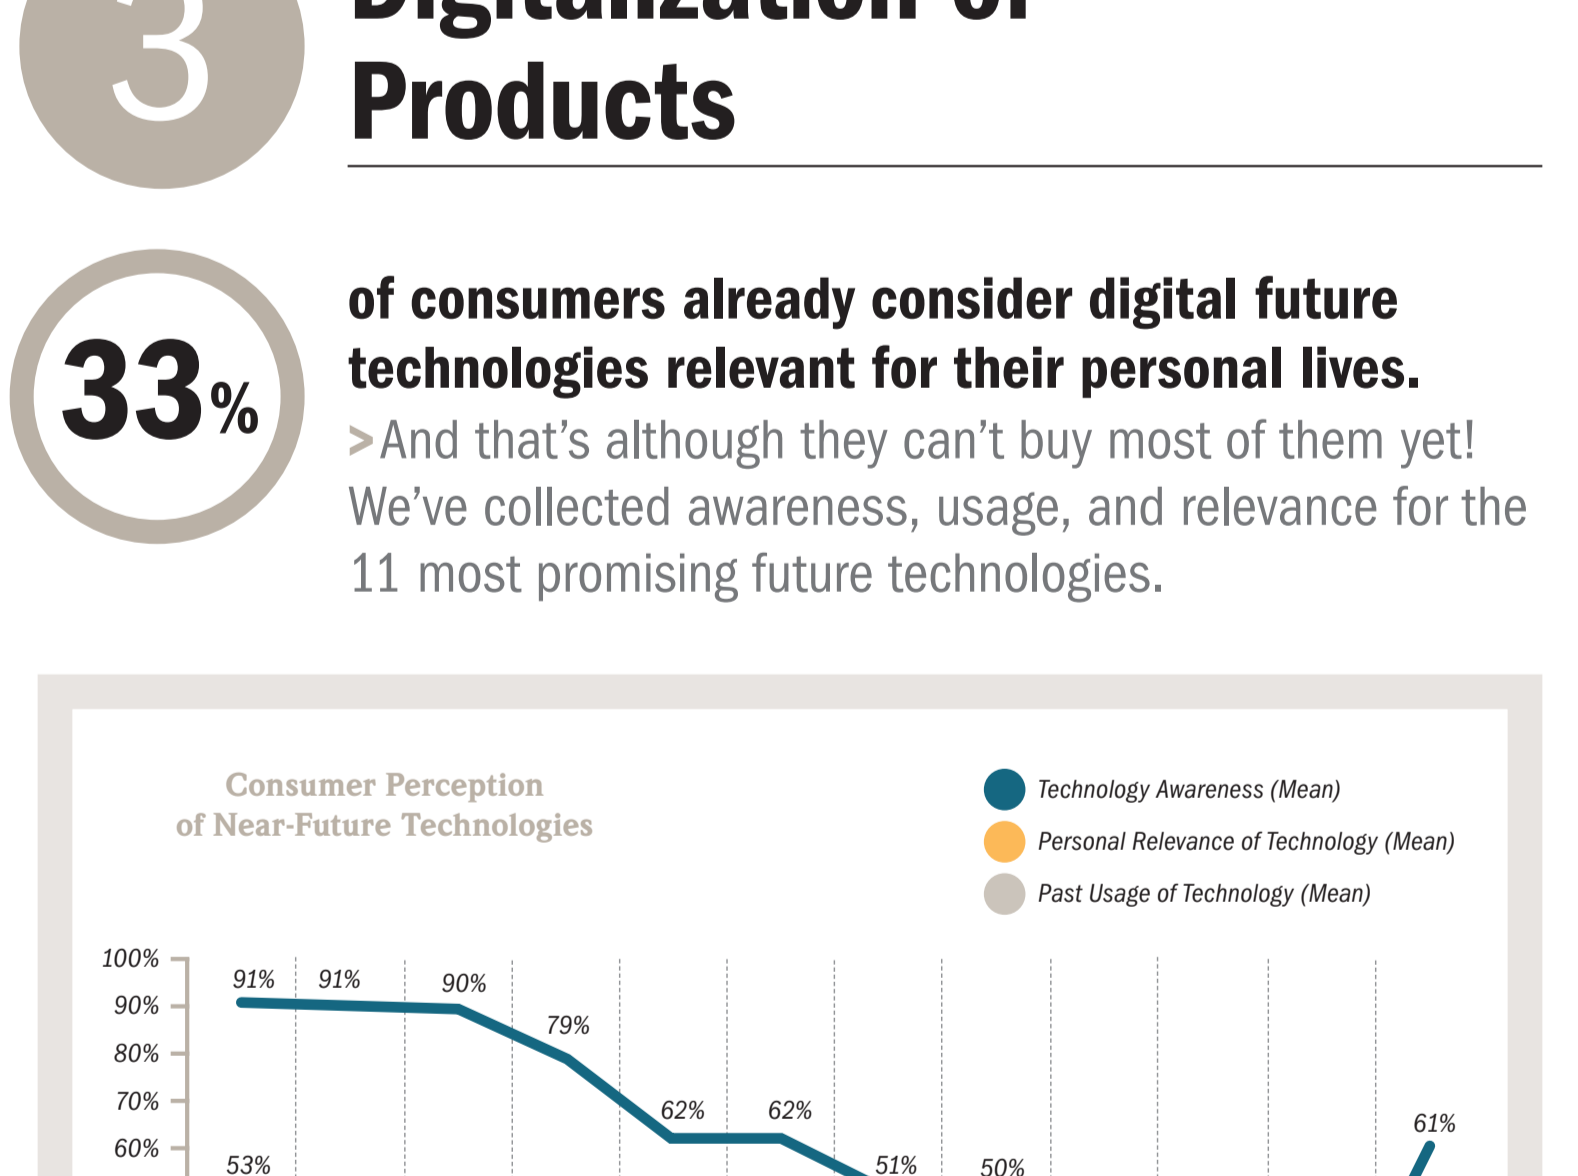

Platform	% of Internet Users that have an Account	Daily Usage Rate in %
YouTube	39.2	43.1
My Video	8.4	25.9
Clipfish	5.5	25.9
Vimeo	1.9	25.7
Dailymotion	1.6	21.5
Vine	0.6	37.2
Instagram	6.7	54.9
Picasa	4.3	22.4
Flickr	2.1	24.6
Pinterest	1.5	32.0
Photobucket	0.6	27.2
Spotify	6.5	33.1
Sound-Cloud	2.6	26.2
last.fm	2.3	16.1
Simfy	0.5	50.0
Myluke	0.3	39.5

Eye-opener 1: Managers, chances have never been better to participate in consumer conversations. Adjust your communication strategies and get the conversation started today!

2 Digitalization of Consumption

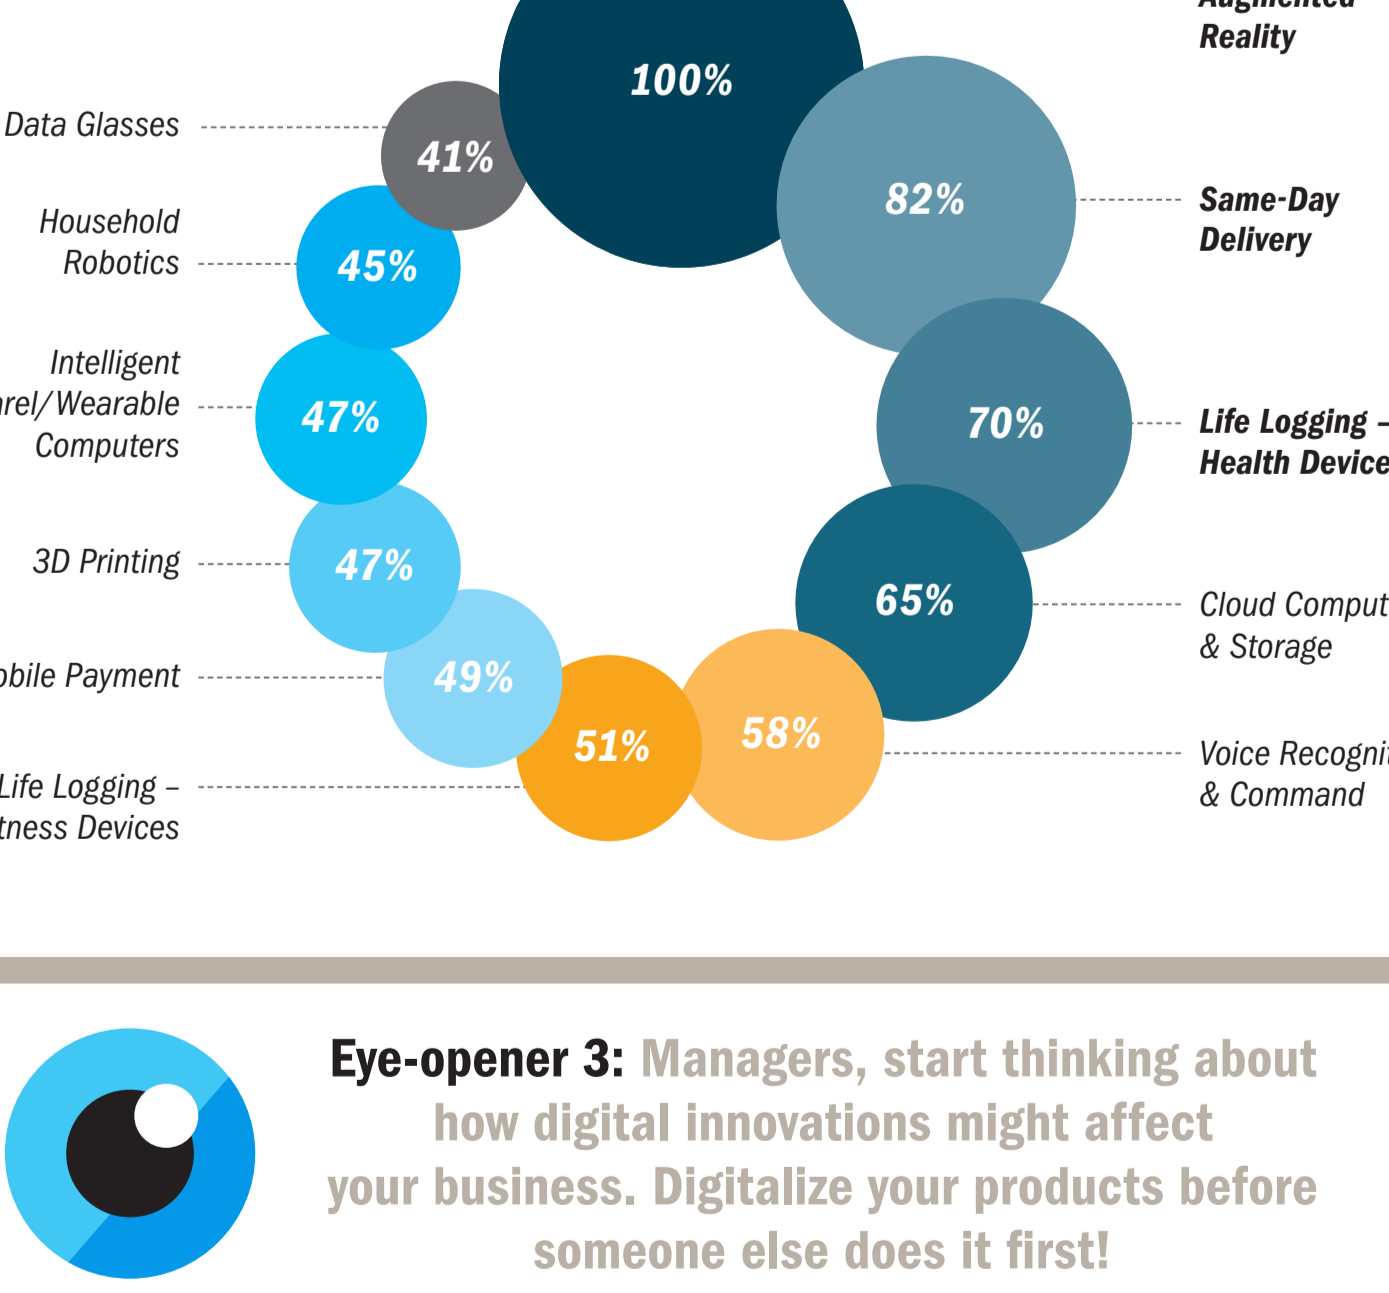

41% of all decision-relevant shopping information comes from digital sources. > These sources are the Internet, mobile devices, digital television, digital newspapers, digital radio, digital telephones, and increasingly more connected devices.

Percentage of Information Coming from Digital Sources for Consumption Decisions

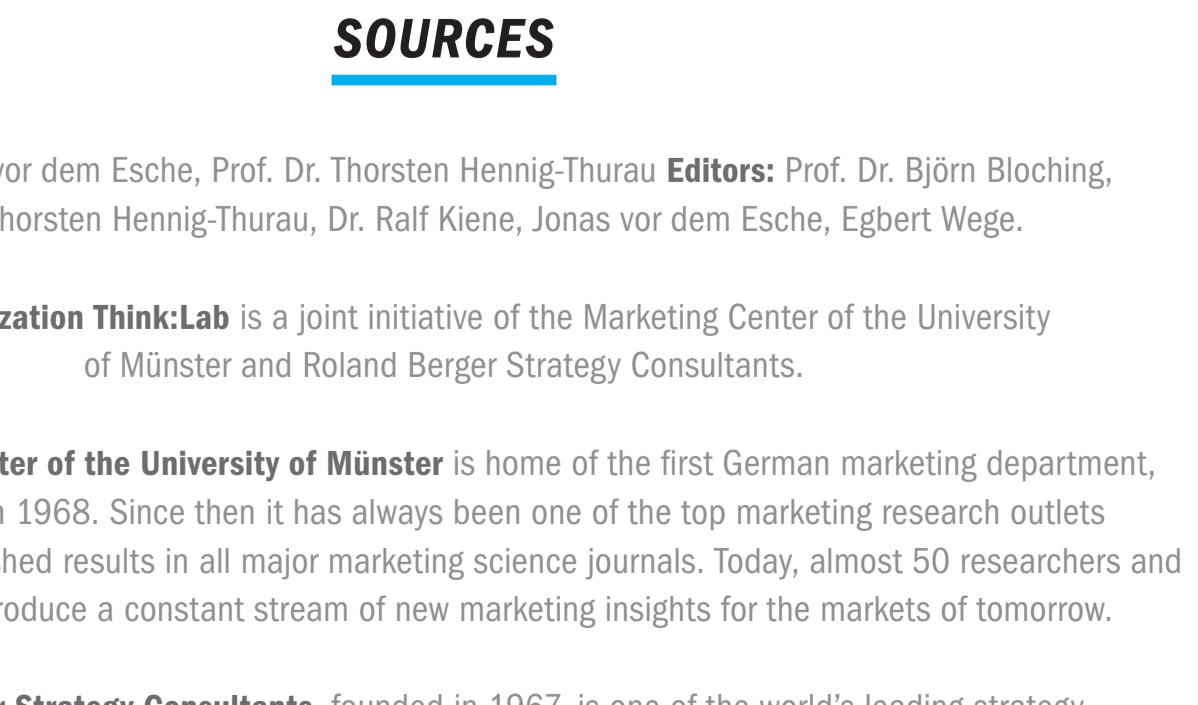

25% of all decision-relevant shopping information comes from either the Internet or social media. > TV, print, and radio are by far not the most effective media channels anymore.

Importance of Different Information Sources for Purchase Decisions in Germany

2.6x more influential, that is what online shopping information is compared to shopping information from TV. > However, media spending on television is still 2.9 times higher than media spending on online marketing!

Importance of Information Sources vs. Media Spending

41% of all first-time product and service purchases are through digital channels. > For the travel industry this rate goes even up to 80%.

Percentage of First-Time Purchases Through Digital Channels

Eye-opener 2: Managers, adjust your marketing budgets and make also sure your distribution strategy is up to date!

3 Digitalization of Products

33% of consumers already consider digital future technologies relevant for their personal lives. > And that's although they can't buy most of them yet! We've collected awareness, usage, and relevance for the 11 most promising future technologies.

"Augmented Reality", "Same Day Delivery", and "Life Logging Devices for Health Care Purposes" are the most relevant future technologies for tech-savvy consumers.

Eye-opener 3: Managers, start thinking about how digital innovations might affect your business. Digitalize your products before someone else does it first!

THE DATA

Large-scale, representative survey among German consumers with:
